Project
Modify an existing wharf to result in a 140’ long, 4’ wide, straight stake supported wharf and install an un-canopied boat lift in accordance with plans attached.

Background
The applicant, Peter Voll, seeks to extend an existing 40’ long pier to 140’. Variances are required for encroachment into the 20’ sideline setback as well as offshore distance relative to the mean high water mark.

The subject property is located between Hague Brook and the Hague town beach. The applicant has owned the property for over thirty years, and indicates that operation of a vessel from the dock has become very difficult due to uniquely shallow water conditions.

Permits are not required from the Town, APA, or DEC. The Town, as a neighbor to the property, is supportive of the application as represented by Zoning Officer.

No public comments have been received.

Regulatory Determinations
SEQRA:
The application represents a Type II action, and not additional environmental review is required by SEQRA.

VARIANCE
The Commission must determine if the documentation presented is sufficient to prove unnecessary hardship as set forth in Section 645-8.3 Standard:

(a) No variance shall be granted under this Subpart unless the applicant shall establish by substantial, credible evidence unnecessary hardship.

(b) In order to establish unnecessary hardship, an applicant must demonstrate:

(1) unique and peculiar conditions to the applicant’s particular situation which impose a substantial technological, financial or safety burden upon the applicant or the public;

(2) that because of such uniqueness, there is no reasonable possibility that the applicant’s property or, if no property is involved, the continuation of the application’s business, enterprise, use or activity will bring a reasonable return following conformity with the regulations of the Commission;

Date prepared May 15, 2019
(3) that the proposed activity will have no adverse impact on the public health, safety or welfare, the environment or the resources of the Park; and

(4) that the granting of a variance will not alter the essential character of the area in which the proposed use or activity is located, and will not lead to congestion in the Park.

If the variance documentation is deemed sufficient to prove unnecessary hardship the Commission must then make findings under provision 6NYCRR 646.1.6(a):

FINDINGS FOR MARINAS, DOCKS, MOORINGS APPLS
The Commission must make findings under provision 6NYCRR 646-1.6(a):

"Prior to granting any permit relative to a dock, wharf, mooring or marina, the Commission shall ascertain the probable effect of the proposed facility and the operation thereof on the health, safety and welfare of the public and on the resources of the Park. The Commission shall also ascertain the impact of the proposed facility upon the congestion of Lake George and the probable visual, cultural and audible effects of the proposed facility on the neighborhood in which the facility is proposed and on the Park. Where the Commission determines that the facility will have an undue impact upon the health, safety, or welfare of the public or the resources of the park, lead to overcrowding or congestion, or cause undue visual, cultural or audible impacts on the neighborhood or the Park, a permit shall be denied."

This review is based on a review of fee records and dock & mooring registrations and permits. The sketches, drawings and surveys associated with this FILE REVIEW have been compiled from Lake George Park Commission records of docks and moorings at the subject property for the purpose of describing the size, shape and location of all docks and location and swing of all moorings authorized at the property. This compilation is for the convenience of the Commission and the homeowner, and does not include the complete, original authorization of each structure, which may include limits not represented by the graphic representations attached to this REVIEW. Each structure should have a full document associated with it's original placement and copies of these documents are available on request. In the cases of docks, an Existing Wharf Registration (1981), a permit, or consent order should be associated with each structure. Single moorings were not required to be documented or permitted prior to 1988 so information on the location of moorings pre-dating 1988 may not be on record. Registration of moorings has been required since 1988 so that all "grandfathered" moorings are listed, whether a location is known or not. These "grandfathered" moorings must have been placed legally in the first instance and comply with offshore limits and property boundary limits in effect at the time of placement.

Re: DEC #50-86-0427

Dear Mr. Voll:

Enclosed is your permit which was issued in accordance with the applicable provisions of Environmental Conservation Law. Please review the general and special conditions that are intended to minimize the environmental disturbances associated with your project.

Please note that it is the responsibility of the permittee and his agents to comply with all permit conditions. Further, the permit is valid only for the activity expressly authorized. Work beyond the scope of the permit shall be considered as work without a permit. Any failure to comply with these terms may be treated as a violation of Environmental Conservation Law. Questions regarding the terms of the permit should be directed to Michael P. White of our Regional Office (telephone (518) 623-3671).

Should your plans change, please contact this office to determine if modifications of the permit are required.

Thank you for your interest in environmental conservation.

Sincerely yours,

Michael P. White
Alternate Regional Permit Administrator

PERMIT ISSUED TO
Peter J. Voll
146 Robin Road, Glastonbury, Ct. 06033

LOCATION OF PROJECT
Mouth of Hague Brook
COUNTY
Warren
TOWN
Hague

DESCRIPTION OF PROJECT/FACILITY
Construct 4' X 40' stake supported pier as depicted on the attached project sketch.

GENERAL CONDITIONS
By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations and the conditions specified herein or attached hereto.

1. The permittee shall file in the office of the appropriate regional permit administrator or other office designated in the special conditions a notice of intention to commence work at least 48 hours in advance of the time of commencement and shall also notify him/her promptly of the completion of the work.

2. The permitted work shall be subject to inspection by an authorized representative of the Department of Environmental Conservation which may order the work suspended if the public interest so requires.

3. The permittee has accepted expressly by the execution of the application, the full legal responsibility for all damages direct or indirect, of whatever nature and by whomever suffered arising out of the project described herein and has agreed to indemnify and save harmless the State from suits, actions, damages and costs of every name and description resulting from the said project.

4. The Department reserves the right to modify, suspend or revoke this permit at any time after due notice and hearing when:
   a) the scope of the project is exceeded or a violation of any condition of the permit or provisions of the ECL and pertinent regulations are found;
   b) the permit was obtained by misrepresentation or failure to disclose relevant facts;
   c) newly discovered information or significant physical changes are discovered since the permit was issued.

5. The permittee is responsible for keeping the permit active by submitting a renewal application, including any forms, fees or supplemental information which may be required by the Department, no later than 30 days (180 days for SPDES or Solid or Hazardous Waste Management permits) prior to the expiration date.

6. This permit shall not be construed as conveying to the applicant any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work or as authorizing the impairment of any rights, title or interest in real or personal property held or vested in a person not a party to the permit.

7. The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way which may be required for this project.

8. Issuance of this permit by the Department does not, unless expressly provided for, modify, supersede, or rescind an order or consent or determination by the Commissioner issued heretofore by the Department or any of the terms, conditions, or requirements contained in such order or determination.

9. Any modification of this permit granted by the Department must be in writing and attached hereto.

SPECIAL CONDITIONS

For Article 9 (Lake George Recreational Zone Regulations)

10. All scrap or unused construction materials shall be removed from the ice and/or waters of Lake George.

11. Disturbance to the bed and banks of Lake George shall be kept to the minimum level necessary to complete the project.

12. That the State of New York shall in no case be liable for any damage or injury to the structure or work herein authorized which may be caused by or result from future operations undertaken by the State for the conservation or improvement of navigation, or from other purposes, and no claim or right to compensation shall accrue from any such damage.

13. All necessary precautions shall be taken to preclude contamination of any wetland or waterway by suspended solids, sediments, fuels, solvents, lubricants, epoxy coatings, paints, concrete, leachate or any other environmentally deleterious materials associated with the project.

14. All activities authorized by this permit must be in strict conformance with the approved plans submitted by the applicant or his agent as part of the permit application.

AUTHORIZED ACTIVITY

Installation of four uncovered boat lifts in accordance with plans attached as Schedule A and made part of this permit.

By the acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the Environmental Conservation Law, the Navigation Law, all applicable regulations, and the General and Special Conditions included as part of this permit.

Permit Administrator: Michael P. White
Lake George Park Commission, PO Box 749, Lake George NY 12845, 518-668-9347

Authorized Signature

Date 9/7/07

Page 1 of 6
1. All activities authorized by this permit must be in strict conformance with the plans attached as Schedule A and made part of this permit. Modifications to the project require prior approval in writing from the Commission.

2. The permittee and any contractor, project engineer, or other person responsible for the overall supervision of this project shall read, understand and comply with this permit, including all special conditions to prevent environmental degradation.

Inspections
3. The Commission and/or the Department of Environmental Conservation (the Department) may conduct such on-site surveys, investigations, examinations, and evaluations from time-to-time as it deems necessary to ensure compliance with the terms and conditions of this permit.

4. A copy of this permit must be available at all times at the project site during performance of the authorized activities. Failure to produce a copy of the permit upon request by a Commission or a Department representative is a violation of this permit.

Permit Modifications & Renewals
5. The permittee is responsible for keeping the permit active by submitting a renewal application, including any forms, fees or supplemental information which may be required by the Commission, no later than 30 days prior to the expiration of this permit.

6. Any change or modification in any of the activities authorized by this permit is subject to prior review and approval by the Commission. Any modification of this permit granted by the Commission must be in writing and attached hereto.

7. The permittee is responsible for obtaining any other permits, approvals, land easements, and rights-of-way which may be required for this activity.

Other Legal Obligations of Permittee
8. Granting of this permit does not relieve the permittee of the responsibility of obtaining any other permission, consent, permit, or approval from the US Army Corps of Engineers, US Coast Guard, NYS Office of General Services, NYS Department of Environmental Conservation, NYS Department of Health, Adirondack Park Agency, or local government which may be required.

9. This permit shall not be construed as conveying to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work or as authorizing the impairment of any rights, title or interest in real or personal property held or vested in a person not a party to the permit.

10. The permittee has accepted expressly, by the execution of the application, the full legal responsibility of all damages, direct or indirect, or whatever nature, and by whomever suffered, arising out of the project described herein and has agreed to indemnify and save harmless the State from suits, actions, damages and costs of every name and description resulting from the said project.

11. The State of New York shall in no case be liable for any damage or injury to the structure or work herein authorized which may be caused by or result from future operations undertaken by the State for the conservation or improvement of navigation, or for other purposes, and no claim or right to compensation shall accrue from any such damage.

12. Regulatory fees are due April 1 of each year for docks, wharves and moorings.

13. Wharves and moorings authorized herein may be used for marina purposes only in conjunction with a valid Class A marina permit or Class B registration issued by the Commission.

Environmental Protection
14. Disturbance to the bed and banks of Lake George shall be kept to the minimum necessary to complete the project.

15. All necessary precautions shall be taken to preclude contamination of any wetland or waterway by suspended solids, sediment, fuels, solvents, lubricants, epoxy coatings, paint, concrete, leachate or any other environmentally deleterious materials associated with the project.

16. Heavy equipment, including bulldozers, backhoes, payloaders, etc., shall not be driven in the water.

17. Any material dredged in the prosecution of the work herein permitted shall be removed evenly, without leaving large refuse piles, ridges across the bed of a waterway or floodplain or deep holes that may have a tendency to cause damage to navigable channels or to the banks of a waterway.

18. Any debris or excess materials from construction of this project shall be immediately and completely removed from the bed and banks of all water areas to an appropriate upland area for disposal.

19. There shall be no unreasonable interference with navigation by the work herein authorized.
20. If upon the expiration or revocation of this permit, the project hereby authorized has not been completed, the permittee shall, without expense to the State, and to such extent and in such time and manner as the Commission or the Department may require, remove all or any portion of the uncompleted structure or fill and restore the site to its former condition. No claim shall be made against the State of New York on account of any such removal or alteration.

21. If future operations by the State of New York require an alteration in the position or the structure or work herein authorized, or if, in the opinion of the Commission or the Department, it shall cause unreasonable obstruction to the free navigation of said waters or flood flows or endanger the health, safety or welfare of the people of the State, or cause loss or destruction of the natural resources of the State, the owner may be ordered by the Commission or the Department to remove or alter the structural work, obstructions, or hazards caused thereby without expense to the State.

Wharf Construction Specifications
The following conditions apply to all newly constructed wharfs which have not received a variance from any of these limits:

22. The location of the mean low water mark must be field verified prior to construction. In no case shall any part of the wharf extend further than 40' from the mean low water mark.

23. The maximum surface area of any dock or wharf shall be seven hundred square feet, including any walkway.

24. The maximum width of any pier shall be eight feet and the minimum width of any pier shall be two feet.

25. The maximum width of any dock or wharf, including all lateral projections, shall be forty feet.

26. No structure shall be constructed on a dock, wharf or mooring which exceeds sixteen feet in height above the mean high water mark and which is not in compliance with local zoning.

27. Every dock or wharf constructed shall have a minimum setback of twenty feet from the adjacent property line extended into the lake on the same axis as the property line runs onshore where it meets the lake, or at a right angle to the mean high-water mark, whichever results in the greater setback.

Crib Work
28. Stone used for filling shall be clean (not contain any material than can pass through a No. 8 sieve). The stone shall not be less than six (6) inches in diameter.

29. No rocks for use in construction are to come from the lake bed.

The following specifications apply to the construction or replacement of rock-filled cribs. Existing cribs may be repaired.

30. The size of any individual crib shall not exceed 8 feet by 12 feet.

31. Spacing between cribs shall not be less than 8 feet. A minimum of 6 feet of open water shall be maintained between the shoreline and the first crib to allow for free circulation of water.

32. Completed cribs shall be of the "open-sided" type construction and provide for at least 40% unboarded water contact area to the rock fill.

33. If granted under 6NYCRR Part 608, the Lake George Park Commission hereby certifies that the subject project will not contravene effluent limitations or other limitations or standards under Sections 301, 302, 303, 306 and 307 of the Clean Water Act of 1977 (PL 95-217) provided that all of the conditions listed herein are met.

Moorings
The following conditions apply to all new moorings which have not received a variance from any of these limits.

34. Moorings shall be placed so that vessels moored to them, at the full swing of their mooring or anchor line, will be no closer than twenty feet to the projection of the property lines extended into the lake along the axis of the property lines as they intersect the lake, or a line extended at a right angle to the mean high-water mark, whichever results in the greater setback.

35. Moorings shall not be placed so that the full swing of the vessel extends more than one hundred feet offshore from the mean high-water mark.

36. Moorings must meet the following minimum specifications: At least one cubic foot of buoy is to be above the waterline; a one inch strip of reflector tape is to be placed around the upper part of the buoy; the buoy shall be all white with a one inch blue strip placed horizontally around the circumference above the water line.
37. The dock and boat lifts shall be installed no earlier than Memorial Day weekend and removed by Columbus Day weekend.

38. The permittee shall not interfere with or abridge free access of anglers to the shallow waters below the mean high water mark.

39. A permanent light shall be maintained at the end of the dock.

40. Should dredging of Hague Brook be accomplished which relieves the shallow water problem, the dock shall be returned to its original 100 foot length.

41. A "Declaration of Restrictions" has been recorded in the Warren County Clerk's offices as a condition of issuance of this permit. This "Declaration of Restrictions" survives the expiration date of this permit and is fully applicable to the dock as permitted herein.

**5. PROJECT DESCRIPTION**

1) Extend current dock to 140' due to shallow water from expansion of the 'Hague Brook Delta'.

2) Place uncovered boat lift 40' from end of newly extended dock.
PROPOSED USE  ☑ RESIDENTIAL  ☐ COMMERCIAL  ☐ ASSOCIATION  ☐ PUBLIC

TYPE OF CONSTRUCTION  ☑ STAKE  □ CRIB  □ PILE  ☐ ARTICULATING  ☐ OTHER
□ CANONICATED BOATLIFT  □ UN-CANONICATED BOATLIFT  □ PWC LIFT  (include manufacturer specification sheet for all lifts)

PROPOSED STARTING DATE  6/1/19  PROPOSED COMPLETION DATE  6/15/19

IS ANY PORTION OF THIS ACTIVITY FOR WHICH A PERMIT IS SOUGHT NOW BEGUN OR COMPLETED?
☐ Yes  ☑ No (if yes, please explain)

IF COMMERCIAL, IS THE FACILITY AND ITS ASSOCIATED LAND USES IN COMPLIANCE WITH APPLICABLE PROVISIONS OF STATE AND LOCAL LAWS, ORDINANCES, RULES AND REGULATIONS?
☐ Yes  ☑ No (if no, please explain)

6. ADJOINING LAKEFRONT PROPERTY OWNERS (available from your town or county real property dept.)

7. CERTIFICATION

I hereby affirm that the information on this form and all attachments submitted herewith is true to the best of my knowledge and belief.

I hereby consent to the Commission staff working directly with my agent, as designated on page 1 of this form, during the review of this application.

During the processing of this application Lake George Park Commission (LGPC) personnel or their assigns may need to visit this site to inspect, measure, make drawings and/or take photographs. I hereby agree that LGPC staff or their assigns may enter upon and pass through this property in order to inspect the project site or facility, without prior notice, between the hours of 8:00 a.m. and 5:00 p.m., Monday through Friday, while the application is pending. In the event that the project site or facility is posted with any form of "posted" or "keep out" notices, or fenced in with an unlocked gate, this permission authorizes LGPC staff or their assigns to disregard such notices or unlocked gates at the time of inspection.

As a condition to the issuance of a permit, the applicant accepts full legal responsibility for all damage, direct and indirect, or whatever nature, and by whomever suffered, arising out of the project described herein and agrees to indemnify and save harmless the State from suits, actions, damages and costs of every name and description resulting from the said project.

SIGNATURE OF OWNER (Note title if signing for a corporation or association)  DATE

PLEASE COMPLETE ALL ITEMS ABOVE AND INCLUDE WITH THIS FORM:

☒ Application fee
☒ Site location map
☒ Copy of survey if available
☒ Project plans on 8 ½ X 11 size paper - PLANS MUST BE TO SCALE & SHOW ENTIRE LAKEFRONT
☐ Short Environmental Assessment Form if project involves
  • A new Association or Commercial dock or mooring
  • More than one residential dock or mooring
  • A dock or mooring to be located in a wetland, fish spawning area, an area of significant wildlife habitat, or an area of unique scenic, historic or natural significance
☒ Addendum A Co-owner Signature Page (if lakefront is jointly or commonly owned)
☐ Addendum B Parties with deeded or contractual access to this lakefront

Failure to include any one of the required items will result in an incomplete notice and delay in processing your application. Permits and approvals may be required from other agencies and municipalities.

**Variance Request Form**

Please type or print clearly in ink. Use separate addenda and exhibits to provide all supporting documentation.

This form is to accompany the Application for Permit for Docks, Wharfs and Moorings form, or Application for Special Permit for the Construction or Operation of Tour Boats on Lake George, appropriate application fee and all required attachments. There is no additional application fee for requesting a variance.

1. **APPLICANT**  Peter J. Voll

2. **PERSON FILLING OUT THIS FORM**  Peter J. Voll

3. **FACILITY**  N/A

4. **PROJECT**
   - ☒ Wharf Modification/Construction
   - ☐ Mooring Placement
   - ☐ Tour Boat

5. **VARIANCE SOUGHT FROM:**
   - ☒ Property line setbacks
   - ☒ Off-shore distance
   - ☒ Number of wharfs/moorings allowed
   - ☐ Shape of wharf
   - ☐ Area of wharf
   - ☐ Height of structure above wharf
   - ☐ Width of wharf
   - ☐ Width of pier
   - ☐ Tour boats shall be operated from properly permitted marina facilities

6. **Please describe the purpose of the project**
   
   1) Lengthen seasonal stake dock to extend 40' beyond 'Mean Low Water' for a total length of 140' from the shoreline. Full 4' width would result in total sq. ft. of 560'.
   
   2) Place uncovered boat lift 40' from end of dock.

7. **Discuss alternatives that would not require a variance and demonstrate why these are not viable options. (Note: Variance requests should be for the minimum variance necessary to alleviate the hardship.)**

   Alternative to extending dock would be to dredge a 100'x20' channel to reach 'Mean Low Water'. This would be prohibitively expensive and need to be repeated often unless 'Hague Brook Delta' was also dredged.

8. **What conditions unique and peculiar to your situation would impose a significant technological, financial or safety burden if you were required to comply with the regulations?**

   Current 40' dock has become unusable for boats with motors during late summer. Our 17' boat gets stuck/grounded in sand. Water depth has become more shallow each year since 1986 installation of current dock. Property value diminishes with reduced boat access.

9. **List what supporting evidence of unique and peculiar conditions you are attaching to this application to support your answer to question 8.**

   Map B attached shows large shallow area of 'Hague Brook Delta'. One website that outlines the problem is: www1.dec.ny.us/doc regions pdf/
10. Describe in detail why due to the unique and peculiar circumstance described in question 9 above, there is no reasonable possibility that your property or, if no property is involved, the continuation of your business, enterprise, use or activity will bring a reasonable return following conformity with the regulations of the Commission.

1) Lakefront property values are highly tied to having proper boat access. The rapid sedimentation from road-sand run-off has made our waterfront currently highly restrictive in terms of what types of boats can be used. Any motorized boat is now grounding in the sediment/bottom even in early summer when water is higher when accessing our dock.

2) Dredging is too expensive.

3) Overall restricted water access is a result of county decisions on road treatment and management of run-off into lake.

11. List the supporting documentation you have enclosed to support your response to question 10.

Attached survey clearly shows Mean Low Water mark being far from shore (approx. 100').

As in question 9, I point to the Hague Brook Delta expansion: www1.dec.ny.us/doc_regi.jpg

12. What forms of evidence are being submitted to demonstrate that the proposed project will have no adverse impact on the public health, safety or welfare, the environment or the resources of the Park?

Attached Map B shows our proposed extended dock of 140' is well within the perimeter of LGPC bouys that warn of shallow water. Those bouys are 325' beyond the end of our proposed dock thus providing a wide berth of protection from boats navigating nearby. LGPC navigation bouys to the nearby boat launch is 225' from our dock at the closest point.

13. What forms of evidence are being submitted to demonstrate that the proposed project will not alter the essential character of the area in which the proposed use or activity is located, and will not lead to congestion in the park?

1) Our use of our dock will not change with this extension.

2) One benefit of our extended dock is to move any of our boat traffic further from the shoreline and the swimming area of the Hague Town Park/Beach. See Map B.

14. CERTIFICATION

I hereby affirm that the information on this form and all attachments submitted herewith are true to the best of my knowledge and belief.

SIGNATURE OF APPLICANT: ____________________________ DATE: 3-27-19

INCLUDE WITH THIS FORM

- A completed permit application, application fee and all attachments.

- If the applicant is an Association, Addendum D to the Application for Permit for Docks, Wharfs, and Moorings.

- All supporting documentation referenced in this form.

Re: Restricted Appraisal Report
Mr. Peter J. Voll
9064 Lakeshore Dr, Hague,
Warren County, NY, 12836
Tax Map ID#: 43.5-1-50 (0.12 acres)

Dear Park Commissioners:

At the request of Mr. Peter J. Voll, the owner of record for 9064 Lakeshore Drive, Hague, New York, I have prepared a report, for the above referenced property, which may be briefly described as follows:

The subject property also known as 9064 Lakeshore Drive, is a single-family residence. The property fronts the western shore of Lake George containing approximately 136 feet of shoreline according to Warren County tax map panel number 43.05 dated April 11, 2016. The subject is a 1,260 square foot colonial home containing five bedrooms and two full bathrooms. At the rear there is an attached two-car garage. The tax map indicated that the shoreline is approximately 136 feet. Currently there is a stake dock, the dimensions of which are 4 feet wide by 40 feet long, approximately.

The property history, according to the owner, indicates that the existing 40-foot dock was capable of docking recreational motor boats without hitting the bottom surface area at the dock. Due to the build up sediment deposits, the mean water height from the shoreline has decreased, preventing the owner from being able to dock his boat, thus rendering the dock functionally obsolete from its original intended use at the time of purchase.

The Lake George waterfront home market consists of two market segments. These segments include homes with docks specifically intended to be used for the docking of boats and homes without boat docks. This report will show that Mr. Voll’s investment will lose a significant portion of its value as a result of not being able to replace or reproduce the current dock with a dock capable of securing boats in the water as intended with the original purchase.
Scope of Work

According to the Uniform Standards of Professional Appraisal Practice, it is the appraiser’s responsibility to develop and report a scope of work that results in credible results that are appropriate for the appraisal problem and intended user(s). Therefore, the appraiser must identify and consider:

- the client and intended users;
- the intended use of the report;
- the type and definition of value;
- the effective date of value;
- assignment conditions;
- typical client expectations; and
- typical appraisal work by peers for similar assignments.

This report is prepared for Mr. Peter Voll and the Lake George Park Commission. The problem to be solved is to estimate the potential material damages of the subject property. The intended use is for Lake George Park Commission permit application. This appraisal is intended for the use of Lake George Park Commission and Mr. Peter Voll.

Criteria for Comparable Property Selection and Summary of Findings

Research was conducted to establish the correlation, if any, in the difference in value between properties on Lake George whose waterfront homes that contained docks and properties whose waterfronts do not contain docks.

Within the past 36-month period from 2016 to 2019 there were approximately 440 Lake George sale transactions through the Southern Adirondack Association of Realtors and the greater Capitol Association of Realtors. The property types include property with direct frontage on Lake George and those with deeded access via right of ways, easements and associations. The sale prices varied from $26,000 for time shares to $5,500,000 for a residential large estate.

Based on the description of the subject property as described above, the criteria for comparable data selection was very specific. The subject is not a new construction. The criteria therefore did not include sales of newly constructed home or proposed construction. Each home has direct access to the waterfront. Homes with deeded access were not selected. Homes were selected within the town of Hague or from competing markets such as Ticonderoga and Putnam. The subject’s gross living area is approximately 1,260 square feet in size. No homes over 2,000 squares were selected. The subject has a stake dock. Homes with stake docks or a similar design were selected. Homes with boat houses or covered docks were not selected for this analysis.

Given the specific selection parameters stated above, eight purchases best fit the selection criteria for comparability to the subject property. Four homes contained a dock and four homes did not contain a dock. The sale information for each property is exhibited below in a tabular format. One table will show information for homes without docks and one table will show information for homes with docks. Each table contains header information identifying the property characteristics. This information includes the address, the size of the home, the size of the shoreline, the sale date, the sale price, and the price per square foot. All of the sales were verified, and each transaction was arm’s length in nature.
Exhibit Table 1: Direct waterfront homes with that do not contain docks

</tr>
<tr>
<td>Sale #3 2334 Black Point Rd, Putnam</td>
</tr>
<tr>
<td>Sale #4 8910 Lakeshore Dr, Hague</td>
</tr>
</tbody>
</table>

The table above shows four sales of homes each labeled Sale #1 through Sale #4. The subject’s gross living area is approximately 1,260 square feet. The gross living area for each sales range from 1,100 square feet to 1,892 square feet in size. The subject has a shoreline of approximately 136 feet. The shorelines for each of the sales are 35 feet, 100 feet, 100 feet, and 225 feet, respectively. The subject’s gross living area is approximately 1,260 square feet. The subject’s home size and waterfront size are within the ranges shown in the table above. The subject is not a new construction. The sales above are also not new construction. The sale prices for the homes listed above range from $450,000 to $1,125,000. The table below provides a statistical summary.

Exhibit Table 2: Statistical Summary for properties without docks

</tr>
<tr>
<td>Mean Price</td>
<td>$731,000</td>
</tr>
</tbody>
</table>

The minimum sales price per square foot was $670,000. The maximum sales price was $829,000. The median sales price was $712,500. The mean sales price was $731,000.

The minimum sales price per square foot was $480. The maximum sales price per square foot was $760. The median sales price per square foot was $630. The mean sales price per square foot was $625.
Material Impact on Investment

Exhibit Table 5: Statistical Summary showing price difference between properties without docks and properties with docks.

The indicated median sale price for a home without boating amenities is $490 per square foot. The indicated median sale price for a home with boating amenities is $630 per square foot. The material difference shows a loss in value of 22% for median sales values.

The indicated mean sale price for a home without boating amenities is $474 per square foot. The indicated mean sale price for a home with boating amenities is $625 per square foot. The material difference shows a loss in value of 24% for mean sales values.

<table>
<thead>

<tr>
<td>Indicated Loss in Dollar Amount</td>
<td>$176,400</td>
</tr>
</tbody>
</table>

The selected price per square foot value for the subject property with a boating amenity (dock) is $630 per square foot or $795,000 rounded. The selected price per square foot value for the subject property without a boating amenity (dock) is $490 per square foot or $620,000 rounded. The estimated loss approximately is $175,000

**Conclusion**

The data clearly indicates that Mr. Voll will suffer a significant loss to his original investment without the proposed improvement to his property.

Limiting Conditions and Assumptions

Acceptance of and/or use of this report constitutes acceptance of the following limiting conditions and assumptions; these can only be modified by written documents executed by both parties.

This appraisal is to be used only for the purpose stated herein. While distribution of this appraisal in its entirety is at the discretion of the client, individual sections shall not be distributed; this report is intended to be used in whole and not in part.

No part of this appraisal, its value estimates or the identity of the firm or the appraiser(s) may be communicated to the public through advertising, public relations, media sales, or other media.

All files, work papers and documents developed in connection with this assignment are the property of Sterling Commercial Appraisals, LLC. Information, estimates and opinions are verified where possible, but cannot be guaranteed. Plans provided are intended to assist the client in visualizing the property; no other use of these plans is intended or permitted.

No hidden or unapparent conditions of the property, subsoil or structure, which would make the property more or less valuable, were discovered by the appraiser(s) or made known to the appraiser(s). No responsibility is assumed for such conditions or engineering necessary to discover them. Unless otherwise stated, this appraisal assumes there is no existence of hazardous materials or conditions, in any form, on or near the subject property.

Unless otherwise stated in this report, the existence of hazardous substances, including without limitation asbestos, polychlorinated biphenyl, petroleum leakage, or agricultural chemicals, which may or may not be present on the property, was not called to the attention of the appraiser nor did the appraiser become aware of such during the appraiser’s inspection. The appraiser has no knowledge of the existence of such materials on or in the property unless otherwise stated. The appraiser, however, is not qualified to test for such substances. The presence of such hazardous substances may affect the value of the property. The value opinion developed herein is predicated on the assumption that no such hazardous substances exist on or in the property or in such proximity thereto, which would cause a loss in value. No responsibility is assumed for any such hazardous substances, nor for any expertise or knowledge required to discover them.

Unless stated herein, the property is assumed to be outside of areas where flood hazard insurance is mandatory. Maps used by public and private agencies to determine these areas are limited with respect to accuracy. Due diligence has been exercised in interpreting these maps, but no responsibility is assumed for misinterpretation.

Good title, free of liens, encumbrances and special assessments is assumed. No responsibility is assumed for matters of a legal nature.
Necessary licenses, permits, consents, legislative or administrative authority from any local, state or Federal government or private entity are assumed to be in place or reasonably obtainable.

It is assumed there are no zoning violations, encroachments, easements or other restrictions which would affect the subject property, unless otherwise stated.

The appraiser(s) are not required to give testimony in Court in connection with this appraisal. If the appraisers are subpoenaed pursuant to a court order, the client agrees to pay the appraiser(s) Sterling Commercial Appraisals, LLC’s regular per diem rate plus expenses.

Appraisals are based on the data available at the time the assignment is completed. Amendments/modifications to appraisals based on new information made available after the appraisal was completed will be made, as soon as reasonably possible, for an additional fee.

**Americans with Disabilities Act (ADA) of 1990**
A civil rights act passed by Congress guaranteeing individuals with disabilities equal opportunity in public accommodations, employment, transportation, government services, and telecommunications. Statutory deadlines become effective on various dates between 1990 and 1997. Sterling Commercial Appraisals, LLC has not made a determination regarding the subject’s ADA compliance or non-compliance. **Non-compliance could have a negative impact on value, however this has not been considered or analyzed in this appraisal.**

Glossary
This glossary contains the definitions of common words and phrases, used throughout the appraisal industry, as applied within this document. Please refer to the publications listed in the Works Cited section below for more information.

Works Cited:

1. appraisal; a retrospective estimate based on an analysis of past events assuming a competitive and open market. (Dictionary, 5th Edition)

**External Obsolescence**
An element of depreciation; a diminution in value caused by negative externalities and generally incurable on the part of the owner, landlord, tenant. (Dictionary, 5th Edition)

**Extraordinary Assumption**
An assumption, directly related to a specific assignment, which, if found to be false, could alter the appraiser’s opinions or conclusions. Extraordinary assumptions presume as fact otherwise uncertain information about physical, legal, or economic characteristics of the subject property; or about conditions external to the property such as market conditions or trends; or about the integrity of data used in an analysis. (USPAP, 2010-2011 ed.) (Dictionary, 5th Edition)

**Fee Simple Estate**
Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat. (Dictionary, 5th Edition)

**Functional Obsolescence**
The impairment of functional capacity of a property according to market tastes and standards. (Dictionary, 5th Edition)

**Functional Utility**
The ability of a property or building to be useful and perform the function for which it is intended according to current market tastes and standards; the efficiency of a building’s use in terms of architectural style, design and layout, traffic patterns, and the size and type of rooms. (The Appraisal of Real Estate, 13th Edition)

**Gross Building Area (GBA)**
Total floor area of a building, excluding unenclosed areas, measured from the exterior of the walls of the above-grade area. This includes mezzanines and basements if and when typically included in the region. (Dictionary, 5th Edition)

**Gross Leasable Area (GLA)**
Total floor area designed for the occupancy and exclusive use of tenants, including basements and mezzanines; measured from the center of joint partitioning to the outside wall surfaces. (Dictionary, 5th Edition)

**Highest & Best Use**
The reasonably probable and legal use of vacant land or an improved property that is physically possible, appropriately
supported, financially feasible, and that results in the highest value. The four criteria the highest and best use must meet are legal permissibility, physical possibility, financial feasibility, and maximum productivity. Alternatively, the probable use of land or improved property—specific with respect to the user and timing of the use—that is adequately supported and results in the highest present value. (Dictionary, 5th Edition)

Hypothetical Condition
That which is contrary to what exists but is supposed for the purpose of analysis. Hypothetical conditions assume conditions contrary to known facts about physical, legal, or economic characteristics of the subject property; or about conditions external to the property, such as market conditions or trends; or about the integrity of data used in an analysis. (Dictionary, 5th Edition)

Leased Fee Interest
A freehold (ownership interest) where the possessory interest has been granted to another party by creation of a contractual landlord-tenant relationship (i.e., a lease). (Dictionary, 5th Edition)

Market Area
The area associated with a subject property that contains its direct competition. (Dictionary, 5th Edition)

Market Value
The major focus of most real property appraisal assignments. Both economic and legal definitions of market value have been developed and refined.  
1. The most widely accepted components of market value are incorporated in the following definition: The most probable price that the specified property interest should sell for in a competitive market after a reasonable exposure time, as of a specified date, in cash, or in terms equivalent to cash, under all conditions requisite to a fair sale, with the buyer and seller each acting prudently, knowledgeably, for self-interest, and assuming that neither is under duress.
2. Market value is described in the Uniform Standards of Professional Appraisal Practice (USPAP) as follows: A type of value, stated as an opinion, that presumes the transfer of a property (i.e., a right of ownership or a bundle of such rights), as of a certain date, under specific conditions set forth in the definition of the term identified by the appraiser as applicable in an appraisal. (USPAP, 2010-2011 ed.) USPAP also requires that certain items be included in every appraisal report. Among these items, the following are directly related to the definition of market value:
   • Identification of the specific property rights to be appraised.
   • Statement of the effective date of the value opinion.
   • Specification as to whether cash, terms equivalent to cash, or other precisely described financing terms are assumed as the basis of the appraisal.
   • If the appraisal is conditioned upon financing or other terms, specification as to whether the financing or terms are at, below, or above market interest rates and/or contain unusual conditions or incentives. The terms of above—or below—market interest rates and/or other special incentives must be clearly set
forth; their contribution to, or negative influence on, value must be described and estimated; and the market data supporting the opinion of value must be described and explained.

3. The following definition of market value is used by agencies that regulate federally insured financial institutions in the United States: The most probable price that a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and the seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- Buyer and seller are typically motivated;
- Both parties are well informed or well advised, and acting in what they consider their best interests;
- A reasonable time is allowed for exposure in the open market;
- Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale. (12 C.F.R. Part 34.42(g); 55 Federal Register 34696, August 24, 1990, as amended at 57 Federal Register 12202, April 9, 1992; 59 Federal Register 29499, June 7, 1994)

4. The International Valuation Standards Council defines market value for the purpose of international standards as follows: The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm’s-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently, and without compulsion. (International Valuation Standards, 8th ed., 2007)

5. Market value is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the property would have sold on the effective date of the appraisal, after a reasonable exposure of time on the open competitive market, from a willing and reasonably knowledgeable seller to a willing and reasonably knowledgeable buyer, with neither acting under any compulsion to buy or sell, giving due consideration to all available economic uses of the property at the time of the appraisal. (Uniform Standards for Federal Land Acquisitions) (Dictionary, 5th Edition)

Marketing Time

An opinion of the amount of time it might take to sell a real or personal property interest at the concluded market value level during the period immediately after the effective date of the appraisal. Marketing time differs from exposure time, which is always presumed to precede the effective date of an appraisal. (Advisory Opinion 7 of the Standards Board of The Appraisal Foundation and Statement on Appraisal Standards No. 6, “Reasonable Exposure Time in Real Property and Personal Property Market Value Opinions” address the determination of reasonable exposure and
Obsolescence
One cause of depreciation; an impairment of desirability and usefulness caused by new inventions, changes in design, improved processes for production, or external factors that make a property less desirable and valuable for a continued use; may be either functional or external. (Dictionary, 5th Edition)

Replacement Cost
The estimated cost to construct, at current prices as of the effective appraisal date, a substitute for the building being appraised, using modern materials and current standards, design, and layout. (Dictionary, 5th Edition)

Scope of Work
The type and extent of research and analyses in an assignment. (Dictionary, 5th Edition)
NOTICE OF AVAILABILITY FOR REVIEW
Date: April 03, 2019

TO INTERESTED PARTIES: Comments Due: April 18, 2019
This notice is being sent to allow you an opportunity to comment on the proposed project below. Written comments must be received by the "comments due" date above and should detail specific reasons for your interest, support or opposition.
If you have no comments you do not need to return this form.
Return this form and any comments by email or mail to the above address, the analyst assigned is:
Joe Thouin, joh@gpc.state.ny.us

Applicant: Application: 5226-6-19
Peter Voll
4047 Mt. Philo Rd
Charlotte, VT 05445
Type: DM BL Minor
Wharf Modification
Parcel#: 43.05-1-50
Town of Hague

Project Location: 9064 Lakeshore Drive
Project Description:
Modify an existing wharf to result in a 140' long, 4' wide, straight stake supported wharf and install an un-canopied boat lift in accordance with plans attached

State Environmental Quality Review Lead Agency: None Designated
SEQR Determination: 1 - Type II Action, no further review under SEQR

Thanks Joe. Based on information available to the Agency, wetlands are not likely present in the vicinity of the proposal and the project will not involve wetlands. However, if the applicant believes the area within, or adjacent to the footprint of the proposed dock is vegetated a site visit will be necessary. The site visit would need to occur during the vegetative growing season.
